## Work Experience

### Flickwheel Automobile

Front-end Developer Intern      Jun 2023

- ✓ Collaborated with senior developers on a major app redesign project aimed at improving user experience and simplifying the loan application process, leveraging modern tools.
- ✓ Designed and implemented responsive, user-friendly web pages for the loan application process using HTML, CSS, and JavaScript to ensure a seamless user journey.
- ✓ Quickly learned and utilized Vue.js and Nuxt.js, complementing existing skills in React, and contributed to the front-end development of an evolving application.
- ✓ Worked closely with senior developers to integrate the front-end with backend APIs, ensuring enhanced functionality and reliability in line with current web standards.
- ✓ Resolved layout alignment challenges by utilizing advanced CSS techniques and community support, maintaining the quality of pixel-perfect user interfaces.
- ✓ Used Git for version control, actively engaging in collaborative processes through code reviews with pull requests to promote clean and optimized code standards.

### Hack-lab Hackathon

Front-End Developer      Aug 2022 - Aug 2022

- ✓ Transformed design concepts and wireframes into responsive and visually appealing user interfaces using HTML, CSS, and JavaScript in alignment with best UI/UX practices.
- ✓ Engaged in rapid prototyping to build functional prototypes of web applications, effectively demonstrating the core features and interactions of proposed projects.
- ✓ Collaborated with Back-End developers for seamless integration of front-end code with server-side infrastructure, utilizing APIs and database systems to complete the web solution.
- ✓ Presented developed front-end components and prototypes during the hackathon's final presentation, contributing to achieving the third runner-up position.

## Hotel.ng internship

Front-End Developer

Oct 2022 - Dec 2022

- ✓ Assisted in building beautiful user interfaces for clients without compromising functionality for aesthetics.
- ✓ Implemented newly-learned front-end object-oriented programming to develop client server systems.
- ✓ Participated in the initial wave of developers learning and implementing the React.js library.
- ✓ Utilized HTML, CSS, and JavaScript frame work to create responsive landing pages.
- ✓ Collaborated effectively with fellow team members to develop a cohesive group project while adhering to established timelines.
- ✓ Version Control: Utilized version control systems like Git to manage code collaboration, track changes, and resolve conflicts when working with a team.

## Uwana Collection

Co-founder and Manager Oct 2020 - 2024

- ✓ Grew the fashion and beauty e-commerce business, achieving 100% growth within 3 years.
- ✓ Managed operations, team supervision, and social media marketing, reducing costs by 48% through hybrid transition.

## Gadget Harbor

Social media manager

Mar 2018 - Feb 2020

- ✓ Created digital content strategies that increased customer retention and online presence
- ✓ Performed competitor analysis and drove traffic through SEO and lead generation tactics
